

JONES SPEEDOMETER - ODOMETERS for automobile use are made for attachment to the dashboard and are actuated by means of a flexible shaft and gear attachment on the wheel of the car.

❑ The **DRIVING GEAR** consists of a large gear attached to the hub of the wheel and a small gear carried by a ball-bearing shaft at the end of the flexible cable and supported on the steering knuckle by means of an attaching bracket.

❑ The **SPEEDOMETER - ODOMETERS** shown on first page, indicate variable and maximum speed and register the distance traveled. The season mileage to 9999 9/10 and the day or "trip" mileage to 99-9/10, is cumulatively recorded, whether the car go forward or backward.

❑ The Trip register can be instantly reset to zero by pushing the button.

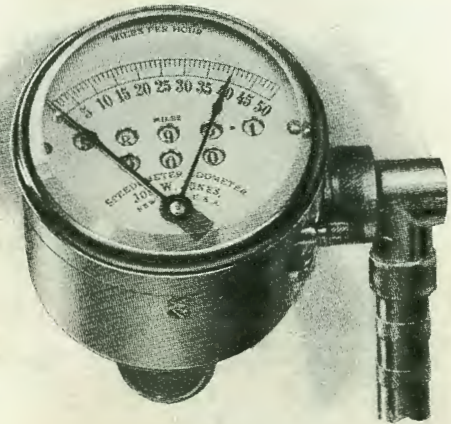

❑ The copper maximum Speed Hand contrasts with the black variable hand. It is carried forward by the latter, but stops automatically at the highest speed attained, showing that speed as a permanent record until released by a push of the resetting stem at the bottom of the cup. When released, the maximum hand instantly returns to the speed at which the car is at that moment travelling and there again remains, even after the car is subsequently stopped; thus giving absolutely indisputable evidence of the speed of the car at the moment of resetting.

❑ By pushing and giving the resetting stem a half turn, the two hands are made to work as one, indicating variable speed only.

❑ These Speedometers are the only instruments made which have both the **MAXIMUM HAND** and the **INSTANTANEOUS TRIP RESET FEATURES**.

❑ In ordering, state clearly the type and model of instruments; the make and model of your car; the tire diameter of front wheel, and whether intended for attachment to right or left side.

Jones Combination Speedometer - Odometer

MAXIMUM HAND

Model 14, 3 inch dial, 50 mile, \$ 75.00

Model 19, 3 inch dial, 60 mile, \$ 80.00

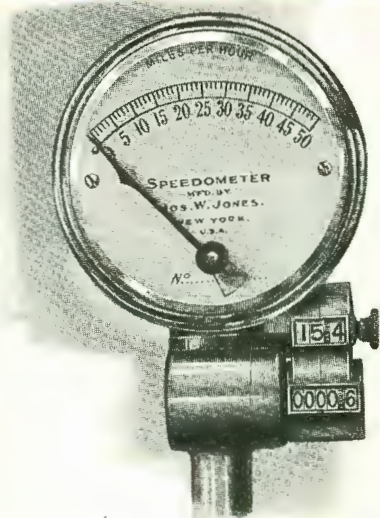

Model 15, 4 inch dial, 60 mile, \$ 90.00

Model 16, 4 inch dial, 100 mile, \$100.00

JONES SPEEDOMETER

76th Street and Broadway, New York

BOSTON CHICAGO PHILADELPHIA
109 Mass. Ave. 1421 Michigan Ave. 259 N. Broad St.
CLEVELAND, 1841 Euclid Ave.

Model 20, 3 inch dial, 50 mile \$40.00
Model 21, 3 " " " 60 " 45.00

Model 22, 3 inch dial, 50 mile \$25.00

☞ Models 20, 21 and 22 shown above have been added to our line to meet the demand for inexpensive instruments to be used for Cars of moderate cost.

☞ The Speedometer movement like other Jones Models is based on the principal of centrifugal force and we guarantee **permanent accuracy** and **perfect construction.**

☞ In Models 20 and 21 the Season Mileage to 10,000 and the trip mileage to 100 is registered by the "Veeder" Odometer, the trip being reset by turning the figures back to zero by means of the stem provided.

☞ The Driving Mechanism is the same as on our standard instruments.

☞ In Model 22 the Season but not the trip mileage is recorded.
