*Herein is proof conclusive that the oldest  
watch factory is also the youngest  
and most up-to-date*

## WALTHAM EIGHT-DAY TIMEPIECES

### AN INNOVATION IN AUTOMOBILE TIMEPIECES

---

The Latest Example of the Watch Manufacturers' Skill, and the  
Result of the Waltham Watch Company's Constant  
Aim for "Something Better"

---

The name "Waltham" on a watch is recognized in all parts of the world as the sign of quality and reliability. Waltham watches were the first to meet the needs of half a century ago, and are to-day foremost in their adaptability to 20th century requirements.

Waltham 8-Day watches are fully up to our high standard of the past, and are the result of the constant advance in design, demanded by present day conditions.

Waltham 8-Day Movements used in Automobile Timepieces are *adjusted to temperature*, an innovation in an 8-day timepiece. They have two extra long mainsprings, are equipped with safety steel barrel, have 15 jewels, Breguet hairspring, and patent winding indicator.

They combine with usefulness, beauty in design and proportion.

We invite the public to a careful examination of these fine timepieces, and a comparison with imported movements of a similar character.

## WALTHAM EIGHT-DAY TIMEPIECES

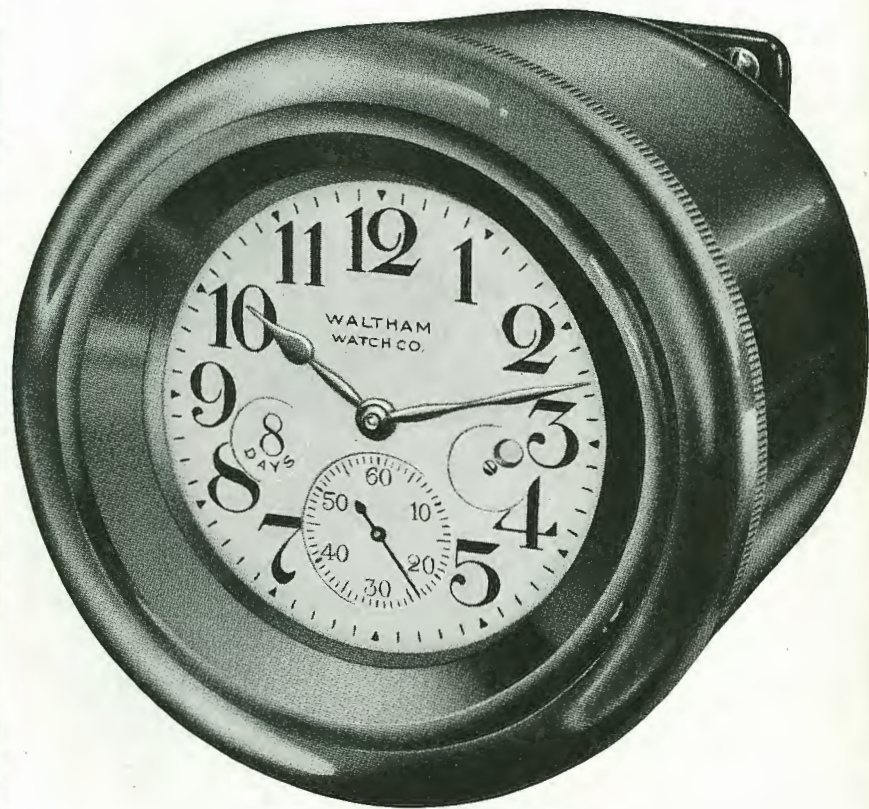

FOR AUTOMOBILES OR MOTOR BOATS

MODEL B  
ACTUAL SIZE

This model is well adapted for Limousines, Coupés, Landaus, and other closed cars. It also makes a very good dash clock for touring cars. It is absolutely proof against theft.

## WALTHAM EIGHT-DAY TIMEPIECES

### FOR AUTOMOBILES OR MOTOR BOATS

MODEL D  
WATERPROOF CASE  
ACTUAL SIZE

These casings are both dust and waterproof. The inner case, containing the movement, is secured to the outer case in such manner that the watch cannot readily be stolen. The timepiece is on a bracket, which sets out from the dash.

## WALTHAM EIGHT-DAY TIMEPIECES

### FOR AUTOMOBILES, MOTOR BOATS AND DESK USE

MODEL O  
ACTUAL SIZE, Four Inches Wide

This model is dust and waterproof, and is so constructed as to be proof against theft. When car or motor boat is not in use, this model is well adapted for a desk or mantel timepiece. The dial on these movements is four inches wide, and is the largest dial made for auto watches.

WALTHAM EIGHT-DAY TIMEPIECES

FOR AUTOMOBILES OR MOTOR BOATS

MODEL S  
ACTUAL SIZE

The winding stem is exposed, but is so constructed as to be practically dust and waterproof; and the movement can be wound without unscrewing the bezel. The style of mount makes this a smaller timepiece than the Model D.

WALTHAM EIGHT-DAY TIMEPIECES

FOR AUTOMOBILES OR MOTOR BOATS

MODEL W

This model supplies the demand for a "flush mount" automobile timepiece. The telescopic feature permits easy access to the winding and setting parts. The cases are made of brass, and are dust and waterproof, as well as proof against theft.

WALTHAM EIGHT-DAY TIMEPIECES

FOR AUTOMOBILES OR MOTOR BOATS

MODEL M  
ACTUAL SIZE

This is one of the best "flush mount" timepieces for automobiles. It is dust and moisture proof. It cannot be stolen from the dash, yet its accessibility and ease of transfer make it the most convenient model yet designed.

WALTHAM EIGHT-DAY TIMEPIECES

FOR AUTOMOBILES OR MOTOR BOATS

MODEL N  
ACTUAL SIZE

Model N is used for special mountings where the space back of the dash is limited and where the timepiece can be attached with screws from the front. This model can also be set into a panel in a desk, and lends itself to various other uses.

## WALTHAM EIGHT-DAY TIMEPIECES

### WALTHAM BOX CHRONOMETER

On the opposite page we show the Waltham Box Chronometer, used by jewelers as a standard timekeeper, and necessarily an instrument of great precision.

#### DESCRIPTION OF MOVEMENT

15 Jewels in settings; adjusted to temperature and isochronism; carefully timed in its case before being shipped from the factory; compensating balance; balance pivot running on diamond; double roller escapement; sapphire jewel pin; two extra long mainsprings; the winding crown winds both main springs simultaneously; pendant set; patent regulator; winding indicator; indicator disc on dial showing red as a signal that it is time to wind the Chronometer.

#### DESCRIPTION OF MOUNT

The movement is enclosed in a dust and weatherproof case with screw back and bezel. The box in which the Chronometer is suspended, is of polished mahogany with brass trimmings, fully up to the highest class of marine Chronometers in every respect. Size of box, 5" x 5" x 5".

Movements and cases are made to Waltham standards in every particular. The Waltham 8-Day Chronometer is a dependable instrument for navigators of large yachts, and an attractive accessory to motor boats.

Price, \$60.00

Customers who contemplate the purchase of one of our 8-Day timepieces for Automobiles, shown on the preceding pages, may be interested to know that the movements there described are of the same model and design of material as the movements in our Box Chronometers.

BOX CHRONOMETER FOR WATCHMAKERS AND  
YACHT NAVIGATORS

ONE-HALF ACTUAL SIZE

## WALTHAM EIGHT-DAY TIMEPIECES

LIMOUSINE SET  
TWO-THIRDS ACTUAL SIZE

The timepiece is similar to the other movements described in this book, but it is mounted in an attractive leather case, which also contains a fine plate-glass mirror and two cut-glass vial-glasses with sterling silver tops. The cases are furnished in either Glazed or Lizard Leather.
